

SIMATS ENGINEERING
ASSESSMENT TOOL 3: MCQ Test

COURSE NAME:	Cloud Computing and Big Data Analytics	COURSE CODE:	CSA15
---------------------	---	---------------------	-------

COURSE OUTCOME COVERED

CO3: *Implement cloud-based solutions using cloud storage, web APIs, and platform services for real-world applications. (BL3)*

Assessment Tool Weightage: 10%

Dave's Taxonomy: Precision (Level 3)
Question Count: 15

Total Marks: 30

Code of Conduct

I Beffy A Shanika(192511387) (Name / Reg No) certify that this submission is my original work and that I have adhered to the guidelines specified for this assessment.

I understand that any violation of academic integrity rules will result in disciplinary action.

Signature of the student: beffy

Assessment

Tasks MCQ

Test

1. Which cloud storage model is best suited for storing virtual machine disks?
 - A. Object storage
 - B. Block storage
 - C. File storage
 - D. Archive storage

Correct Answer: B) Block storage

2. Which protocol style is widely used for lightweight web APIs in cloud platforms?
 - A. SOAP only
 - B. REST
 - C. FTP
 - D. SMTP

Correct Answer: B) REST

3. Serverless computing is best described as:
- A. Computing without networks
 - B. Running code without managing servers directly
 - C. Local execution only
 - D. Batch-only processing

Correct Answer: B) Running code without managing servers directly

4. Edge computing primarily helps by:
- A. Increasing central storage only
 - B. Reducing latency near data sources
 - C. Eliminating internet access
 - D. Replacing cloud storage fully

Correct Answer: B) Reducing latency near data sources

5. Fog computing differs from edge computing because it:
- A. Always runs inside sensors
 - B. Introduces an intermediate distributed layer between edge and cloud
 - C. Works only in private clouds
 - D. Uses no network resources

Correct Answer: B) Introduces an intermediate distributed layer between edge and cloud

6. Which storage model is commonly used for shared departmental files?
- A. File storage
 - B. Register storage
 - C. Cache-only storage
 - D. Tape-only storage

Correct Answer: A) File storage

7. A browser calling a cloud web application typically communicates through:
- A. BIOS interrupts
 - B. Web APIs
 - C. Only command-line tools
 - D. VPN tunnels only

Correct Answer: B) Web APIs

8. SAN stands for:
- A. Secure Access Node
 - B. Storage Area Network
 - C. Shared Application Namespace
 - D. Service Access Network

Correct Answer: B) Storage Area Network

9. Which of the following is a common benefit of serverless architecture?

- A. Manual scaling of servers
- B. Pay-per-use execution model
- C. Dedicated physical hardware ownership
- D. No monitoring required

Correct Answer: B) Pay-per-use execution model

10. Collaboration within the cloud usually improves:

- A. Shared access to services and documents
- B. Hardware disposal speed
- C. Cable management
- D. BIOS configuration

Correct Answer: A) Shared access to services and documents

11. Which one is an example of a platform service?

- A. Managed application runtime
- B. Keyboard driver
- C. Physical rack switch only
- D. Local USB storage

Correct Answer: A) Managed application runtime

12. Object storage is generally preferred for:

- A. Mounting OS boot volumes
- B. Large unstructured cloud data such as images and backups
- C. CPU scheduling
- D. Hypervisor installation

Correct Answer: B) Large unstructured cloud data such as images and backups

13. Which component allows applications to communicate programmatically with cloud services?

- A. Heat sink
- B. Web API
- C. Mouse driver
- D. Compiler cache

Correct Answer: B) Web API

14. A low-latency smart factory use case is best supported by:

- A. Edge computing
- B. Cold archive only
- C. Offline storage
- D. Manual processing

Correct Answer: A) Edge computing

15. Which one is not a typical cloud access method?

- A. Browser-based access
- B. API access
- C. Platform console access
- D. Paper-based access

Correct Answer: D) Paper-based access

MCQ Test Rubric

Criteria	Weightage	Level 4 - Exemplary	Level 3 - Proficient	Level 2 - Developing	Level 1 - Beginning
Conceptual Understanding	30%	Answers reflect strong and accurate concept mastery	Mostly accurate understanding	Partial understanding	Weak understanding
Accuracy of Responses	30%	Nearly all responses are correct	Most responses are correct	Some responses are correct	Few responses are correct
Application Awareness	15%	Shows strong recognition of practical cloud use cases	Reasonable recognition	Limited recognition	Weak recognition
Time Management	10%	Completes assessment efficiently	Completes on time	Needs extra time	Unable to finish well
Question Interpretation	15%	Interprets all items correctly	Misreads very few items	Misreads several items	Frequently misinterprets questions
